

# AIRPORT ACCESS AND PARKING MODERNIZATION

## PROGRAM

The Omaha Airport Authority is modernizing the Terminal Roadway and South Garage to enhance the customer experience at Eppley Airfield.

## OBJECTIVES

These projects were identified in the Terminal Modernization Program planning process and both provide enhancements for the traveling public while positioning Eppley Airfield for long-term growth.

## COSTS

Grants totaling \$12 million from the FAA will contribute to the program's \$28.6 million total cost. The Terminal Roadway is \$20.3 million, and the South Garage is \$8.3 million.

## PROJECT BENEFITS

### TERMINAL ENTRANCE ROADWAY EXPANSION

- New entrance with stoplights and improved signage will make accessing the Airport more convenient.
- Additional traffic lanes will add capacity and provide safe and efficient access for years to come.
- Landscaping and new lighting will enhance the overall experience for travelers.

### SOUTH GARAGE RESTORATION

- Express ramp will provide exclusive access to the new Premier Parking on Level 3 for the most convenient parking option with quick climate-controlled Terminal access.
- Energy efficient lighting and wider stalls will enhance safety and the customer experience.
- New signage and wayfinding will improve circulation, convenience, and efficiency.

## WHAT TO EXPECT

- Access to the Terminal and South Garage will be maintained during all phases of construction and the South Garage will remain open for the duration of the improvements.
- Customers may encounter occasional minor detours on the roadway or closures of certain portions of the South Garage, however no significant delays are anticipated.
- Parking customers are encouraged to use the new North Garage with its convenient entrance off Abbott Drive.
- Work is scheduled to begin in Summer 2021 and anticipated to be complete by late 2022.
